PROFESSIONAL SUMMARY

Technical leadership-driven Lead MERN Stack Developer with 7+ years of experience delivering scalable customer-facing web platforms across travel, checkout, loyalty, and CRM domains. Strong background in React.js, Node.js, Express.js, MongoDB, technical solution delivery, client collaboration, code reviews, production support, and performance optimization. Proven ability to lead teams, translate business needs into execution plans, own critical releases, and resolve high-priority incidents. Growing specialization in agentic AI, LLMs, reinforcement learning, and applied AI engineering.

CORE EXPERTISE

Technical Leadership: Team leadership, mentoring, code reviews, task delegation, release ownership, delivery coordination

MERN Stack & Engineering: React.js, Node.js, Express.js, MongoDB, JavaScript, REST APIs, scalable web application delivery

Performance & Reliability: Performance optimization, production support, incident handling, P0/P1/P2 bug resolution, on-call ownership

AI & Advanced Technologies: Agentic AI, LLMs, reinforcement learning, AI solutions, AI agents, intelligent workflow automation

Domain Exposure: Travel-Tech, Checkout Systems, Loyalty Platforms, CRM, Enterprise web applications

PROFESSIONAL EXPERIENCE

GlobalLogic | Noida, Uttar Pradesh, India

Associate Consultant | Lead MERN Stack Developer **Jul 2024 – Present**

Client: Expedia – Hotwire

- Lead MERN stack delivery for Expedia's Hotwire platform while supervising 4 junior developers.
- Work closely with client stakeholders to gather requirements, clarify scope, prioritize deliverables, and translate business needs into technical plans.
- Distribute tasks across the team, review code, mentor junior engineers, and maintain delivery quality across critical releases.
- Drive performance optimization, technical quality, and overall stability of customer-facing web experiences.
- Own delivery of critical features and handle P0, P1, and P2 production issues with disciplined incident response.
- Provide on-call support across Hotwire and Expedia initiatives as per roster to help maintain production reliability.

Senior Software Engineer **Feb 2022 – Jun 2024**

Client Programs: Expedia Checkout App | One Loyalty

- Contributed to Expedia Checkout App for booking and transaction-related user journeys in a high-traffic environment.
- Worked on One Loyalty initiatives supporting customer engagement and loyalty-focused product capabilities.
- Spent about 1 year at Expedia client location in Gurugram during the Checkout engagement, collaborating directly with client teams.
- Built reusable frontend and backend components, supported feature delivery, resolved production issues, and improved engineering quality.

ConQsys IT (P) Ltd. | Noida, Uttar Pradesh, India

Senior Software Engineer **Sep 2021 – Jan 2022**

Client: National Decorators, New Zealand

- Supported communication, requirement alignment, and delivery of business-focused CRM enhancements.
- Supervised 2 junior software engineers and contributed to team coordination, review quality, and technical execution.

Software Engineer **Oct 2019 – Aug 2021**

Client: National Decorators, New Zealand

- Built and maintained a CRM platform using React.js and Node.js to support lead generation, customer insights, and revenue-oriented decision-making.
- Developed dashboard views and charts showing lead trends, quarterly growth, and yearly business performance.
- Worked across frontend and backend layers to deliver features aligned with client workflows and stakeholder expectations.

Software Engineering Trainee **Apr 2019 – Sep 2019**

- Trained in managed tech development as a beginner trainee at ConQsys, building a strong foundation in MERN stack engineering and software delivery practices.
- Delivered multiple small-scale projects during company-level assessments and internal development evaluations.
- Earned promotion to Software Engineer within 4–5 months through strong learning ability, execution quality, and development potential.
